

NULA DeepSleep ESP32-S3

SKU 333352

What it is

The NULA DeepSleep ESP32-S3 is a low-power development board with 7 μ A deep sleep current, ideal for battery-powered IoT applications.

Key specifications

MCU

MCU Part Number	ESP32-S3
MCU Clock	240 MHz
SRAM	512 KB
Flash	4 MB

Connectivity

Wi-Fi	Wi-Fi 4
Bluetooth	Classic + BLE
Wireless Module	ESP32-S3-WROOM-1 (N8R8)

Interface

qwiic Compatible	Yes
Breadboard Compatible	Yes

Power

Battery Connector	JST 2-pin
Onboard Battery Charger	Yes
Supply Voltage	3.3–5 V
Logic Level	3.3 V
Sleep Current	16 μ A

Typical applications

NULA DeepSleep ESP32-S3 is built for low-power wireless firmware development with the ESP32-S3, especially where periodic wakeups and sensor readouts matter. Use it in battery-backed data loggers, remote controls or interactive gadgets that need Wi-Fi and BLE, with the option to sleep deeply between network activity.

What's in the box

- 1 $\times$ NULA DeepSleep ESP32-S3 (main product)
- 1 $\times$ Header pins (unsoldered) — Header pins included for all breadboard-compatible pins
- 1 $\times$ USB-C cable
